Ina May's Guide to Childbirth Ina May Gaskin, 2008-11-19 What you need to know to have the best birth experience for you. Drawing upon her thirty-plus years of experience, Ina May Gaskin, the nation's leading midwife, shares the benefits and joys of natural childbirth by showing women how to trust in the ancient wisdom of their bodies for a healthy and fulfilling birthing experience. Based on the female-centered Midwifery Model of Care, Ina May's Guide to Natural Childbirth gives expectant mothers comprehensive information on everything from the all-important mind-body connection to how to give birth without technological intervention. Filled with inspiring birth stories and practical advice, this invaluable resource includes: • Reducing the pain of labor without drugs--and the miraculous roles touch and massage play • What really happens during labor • Orgasmic birth--making birth pleasurable • Episiotomy--is it really necessary? • Common methods of inducing labor--and which to avoid at all costs • Tips for maximizing your chances of an unmedicated labor and birth • How to avoid postpartum bleeding--and depression • The risks of anesthesia and cesareans--what your doctor doesn't necessarily tell you • The best ways to work with doctors and/or birth care providers • How to create a safe, comfortable environment for birth in any setting, including a hospital • And much more Ina May's Guide to Natural Childbirth takes the fear out of childbirth by restoring women's faith in their own natural power to give birth with more ease, less pain, and less medical intervention.

Pushed Jennifer Block, 2007-09-10 In the United States, more than half the women who give birth are given drugs to induce or speed up labor; for nearly a third of mothers, childbirth is major surgery -- the cesarean section. For women who want an alternative, choice is often unavailable: Midwives are sometimes inaccessible; in eleven states they are illegal. In one of those states, even birthing centers are outlawed. When did birth become an emergency instead of an emergence? Since when is normal, physiological birth a crime? A groundbreaking journalistic narrative, *Pushed* presents the complete picture of maternity care in America. Crisscrossing the country to report what women really experience during childbirth, Jennifer Block witnessed several births - from a planned cesarean to an underground home birth. Against this backdrop, Block investigates whether routine C-sections, inductions, and epidurals equal medical progress. She examines childbirth as a reproductive rights issue: Do women have the right to an optimal birth experience? If so, is that right being upheld? Block's research and experience reveal in vivid detail that while emergency obstetric care is essential, there is compelling evidence that we are overusing medical technology at the expense of maternal and infant health: Either women's bodies are failing, or

the system is failing women.

Childbirth Across Cultures Helaine Selin, 2009-12-01 This book will explore the childbirth process through globally diverse perspectives in order to offer a broader context with which to think about birth. We will address multiple rituals and management models surrounding the labor and birth process from communities across the globe. Labor and birth are biocultural events that are managed in countless ways. We are particularly interested in the notion of power. Who controls the pregnancy and the birth? Is it the hospital, the doctor, or the in-laws, and in which cultures does the mother have the control? These decisions, regarding place of birth, position, who receives the baby and even how the mother may or may not behave during the actual delivery, are all part of the different ways that birth is conducted. One chapter of the book will be devoted to midwives and other birth attendants. There will also be chapters on the Evolution of Birth, on Women's Birth Narratives, and on Child Spacing and Breastfeeding. This book will bring together global research conducted by professional anthropologists, midwives and doctors who work closely with the individuals from the cultures they are writing about, offering a unique perspective direct from the cultural group.

This Giving Birth Julie Ann Tharp, Susan MacCallum-Whitcomb, 2000 Compelling essays which underline the central place pregnancy and childbirth hold in women's writing. Embracing three centuries of prose and poetry, the anthology traces the evolution of American maternity literature, exploring the difficulties mothers faced as they struggled to transform themselves from objects into maternal subjects. Women as diverse as Anne Bradstreet, Anne Sexton, Sharon Olds, Kate Chopin, Toni Morrison, and Louise Erdrich all labored to reclaim the birthing process by giving voice to experiences and emotions long devalued by a patriarchal culture. Their voices resonate throughout this collection.

Counselling for Maternal and Newborn Health Care World Health Organization, 2010 The main aim of this practical Handbook is to strengthen counselling and communication skills of skilled attendants (SAs) and other health providers, helping them to effectively discuss with women, families and communities the key issues surrounding pregnancy, childbirth, postpartum, postnatal and post-abortion care. *Counselling for Maternal and Newborn Health Care* is divided into three main sections. Part 1 is an introduction which describes the aims and objectives and the general layout of the Handbook. Part 2 describes the counselling process and outlines the six key steps to effective counselling. It explores the counselling context and factors that influence this context including the socio-economic, gender, and cultural environment. A series of guiding principles is introduced and specific counselling skills are outlined. Part 3 focuses on different maternal and newborn health topics, including general care in the home during pregnancy; birth and emergency planning; danger signs in pregnancy; post-abortion care; support during labor; postnatal care of the mother and newborn; family planning counselling; breastfeeding; women with HIV/AIDS; death and bereavement; women and violence; linking with the community. Each Session contains specific aims and objectives, clearly outlining the skills that will be developed and corresponding learning outcomes. Practical activities have been designed to encourage reflection, provoke discussions, build skills and ensure the local relevance of information. There is a review at the end of each session to ensure the SAs have understood the key points before they progress to subsequent sessions.

The Control of Childbirth Phyllis L. Brodsky, 2008-03-14 From pre-classical to present times, this work describes childbirth practices as they have developed through the ages. It critiques the evolution of modern midwifery and obstetrics, focusing especially on how, why and when the process of childbirth became an increasingly sterile, male-dominated, and medically oriented event.-- Provided by publisher.

Women Writing Childbirth Tess Cosslett, 1994 In this work, the author's detailed readings of birth stories - both literary and medical - reveal deeply embedded assumptions about how women are viewed and view ourselves. The current debates about natural childbirth as advocated by Sheila Kitzinger, Grantly Read Dick and others, are examined alongside key literary works by writers such as Doris Lessing, Margaret Atwood, Fay Weldon and Toni Morrison.

Understanding Doulas and Childbirth Cheryl A. Hunter, Abby Hurst, 2016-06-20 This book contextualizes how having a doula, or labor-support woman, present during childbirth results in lower rates of medical interventions. American women are inundated with views that childbirth is inherently risky, their bodies deficient, and therefore encouraged to accept the medicalized nature of childbirth resulting in high rates of unwarranted interventions that can pose significant risk in a normal pregnancy. Why is birthing with a doula different? The narratives in this book support the belief that doulas often question the high rates of medical interventions in childbirth, fundamentally lodging a critique about the medicalization of childbirth to the women they serve. These stories share a very different philosophy about childbirth; one where the female body is capable, resilient, and not normally requiring external medical intervention. Doulas enter into a care-provider relationship that focuses on the experience of the birth as something transformative, to be honored and centered on the woman's body in an active role in the process. Lastly, doulas model to their clients both love and advocacy because doulas believe that modeling these behaviors will translate as women become mothers through the process of childbirth.

This journey was designed to be a spiritual milestone that draws every woman's heart back to the only Deliverer. Angie Tolpin has honored all of us by giving the world a book that guides, inspires, explores and reconsiders that there is a Grand Design in childbirth. Redeeming Childbirth honors God's Word and speaks truth that families can and should remember His presence in the birth room. ~Barbara Harper, RN, CLD, CCE, Founder of Waterbirth International and author of Gentle Birth Choices Angie casts a beautiful vision for making Christ the center of your pregnancy and childbirth. Shedding light on areas of frequent idolatry in our own birth plans, Angie calls out the disunity amongst Christian sisters over birth methods. Through her own birth stories and those of others, Angie shows how God can be glorified in hospital rooms and birthing centers as well as home-births. ~Gretchen Louise, editor at Young Ladies Christian Fellowship Redeeming Childbirth is a much-needed blessing for families and churches. I long for the day when I can buy a stack of this book, ready to bless each new expectant mother with what she really needs: encouragement from a sweet friend, spiritual wisdom, and guidance to trust in God. ~Ann Dunagan, Co-founder of Harvest Ministry, Director of Daring Daughters, Author of The Mission Minded Family and The Mission Minded Child

Birthing Justice Julia Chinyere Oparah, Alicia D. Bonaparte, 2015-12-22 There is a global crisis in maternal health care for black women. In the United States, black women are over three times more likely to perish from pregnancy-related complications than white women; their babies are half as likely to survive the first year. Many black women experience policing, coercion, and disempowerment during pregnancy and childbirth and are disconnected from alternative birthing traditions. This book places black women's voices at the center of the debate on what should be done to fix the broken maternity system and foregrounds black women's agency in the emerging birth justice movement. Mixing scholarly, activist, and personal perspectives, the book shows readers how they too can change lives, one birth at a time.
